

SCOPE

- Understand and walk through the upcoming Project details
- Gather all project details, locations, technologies, team structure
- Discuss the Working Practices structure required for project engagement with Contractors
- Walk through the Compliance process as part of a transparent supply chain process

ASSESS

- From scoping the project provides all information necessary to start engaging with Contractors.
- Through Networks & Referrals, Contractors with the required skillset and history of delivering such projects are met to discuss the upcoming project.
- A B2B format of how delivery took place, technologies in play and how the Contractor would go about delivering this piece of work

DELIVER

- With all details in place Contractors can now engage projects as true Contractors
- Clients receive valuable high skillset in a B2B manner
- Budgets can be achieved when Contractor engagement is set up correctly
- Review of project progress and structure is

COMPLY

- SDS Assessments completed with all parties receiving a copy
- Aligned Client & Contractor Contracts signed and understood
- Full Supply Chain is now of the same understanding on project engagement
- On site client visits to verify contracts are adhered to

DISCUSS

- Working Practice discussions will take place with both Client & Contractor as to the format and structure pre assessment for IR35 purposes.
- B2B set up for Contractor-Client Meet to discuss all project details towards creating a Schedule alongside the Contract.
